

Freerk van den Bos

Student

065-942-1105 | vdbosfreerk@gmail.com | [GitHub](#) | [LinkedIn](#) | Pretoria, Gauteng

Summary

I am a third-year Bachelor of Computing student majoring in Software Engineering at Belgium Campus iTversity with 11 academic distinctions. I enjoy problem-solving and working collaboratively in team environments, especially when building creative and functional software solutions. Experienced in Programming, Web Development and Machine Learning. Seeking full-time Work-Integrated Learning (WIL) or junior roles opportunities.

Projects

AI-Enabled Pilot Fatigue Detection & Safety System (In Progress)

Mar 2026 – Oct 2026

Belgium Campus iTversity

Akasia, Gauteng

Developing an AI-based system to detect pilot fatigue, integrating software with hardware (IoT components) and working in a team to design a real-world safety solution.

PCRC Cycling Club Website

Jul 2025 – Present

Freelance

PTA, Gauteng

Designed and developed a responsive frontend of the official website for the Pretoria Cycling and Racing Club, as part of a personal project during my second year of study.

- Built using HTML, CSS, and JavaScript
- Provide information about the club, events, membership and upcoming races and their results.
- Responsible for website design, update and maintenance
- [PCRC Website](#)

Student Projects

Jan 2024 – Present

Belgium Campus iTversity

Akasia, Gauteng

During my studies I have worked on multiple group projects for my coursework at Belgium Campus iTversity. These projects are demonstrations of what I have learned during my studies and are available in a GitHub Repository.

Experience

Part-Time Promoter

Oct 2021 – June 2025

Metrofibre

Pretoria, Gauteng

I work as a part time (Saturdays) promoter for Metrofibre representing and promoting their brand. My work description includes the following:

- Marketing and brand promotion.
- Distributed flyers and answered client queries.
- Engaged with the public to promote company services.
